

XLure® R.T.U. Inspectors

Monitoring System for Stored Product Insects

...24/7 Surveillance

**Homes:
Pantry areas or
food storage
areas**

Active life: 30-60 days

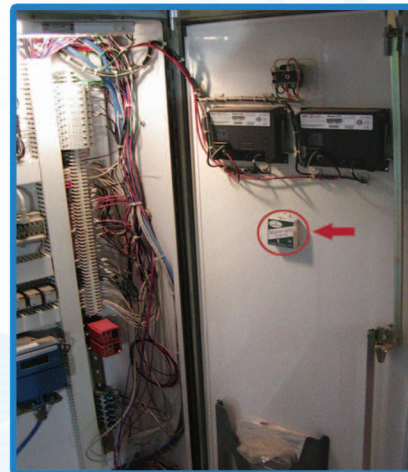

**Grocery stores/
Supermarkets**

XLure R.T.U. Inspectors are pre-baited with 2 different pheromones to continuously attract & capture: Indian Meal Moths, Mediterranean Flour, Almond, Raisin, Tobacco Moths & Cigarette Beetles.

Can be used in residential accounts to help identify stored product insects and their location. Commercial accounts: Supermarkets, pet stores, food processing plants, warehouses, anywhere an effective solution is needed.

Easy to use - remove release paper, fold & it's ready to work for you.

**Electrical panels
in food processing
plants**

Inspectors can be hung with tab or secured to surfaces using double-stick tape on the back of each trap.

The small, compact design allows for use in tight spaces or areas where monitoring should be inconspicuous.

Shelf life: 2 years without refrigeration.
