

# XLure<sup>®</sup> R.T.U Wall Trap -Multi Pheromone Monitoring System

Product Code#: 041-XLF-400

- Product Description :** Wall mounted glue traps pre-baited with Plodia, Ephestia, Lasioderma and Trogoderma pheromones in addition to food attractant for other insects.
- Specification :** Non-drying glue trap with patented Pherogel containing the pheromone blend for the above insects in addition to the food attractant.
- Expected Action :** 8 - 10 weeks attraction of the target insects.
- Placement :** Can affect the amount of insects that will be caught, so for an effective program, it is important that the traps are placed in the best position available, and when they are replaced, the positioning is altered as little as possible so that information from different times of the year can be compared. Traps should be placed when temperatures reach 55°F or higher.
- Application :**
- As part of a comprehensive monitoring program.
  - The rate of use will depend largely on the structure of the monitored location, layout of machinery and ventilation outlet position. For a starting point, place traps in a grid pattern (30' – 50' feet); shorter intervals to pin point infestations. This rate may be changed later to take in consideration the above mentioned parameters.
  - Hang around head high in a position with good air movement. Avoid blocking trap entrances. Place away from fork lift pathways and other potential moving objects. If possible, position should be chosen that offer shelter for the trap (example: near fire hoses or fire extinguishers).
- Common use :** Monitoring of Insect population. Decisions of interventions should not be taken solely on trap catch. Other means of insect sampling should also be considered.
- Insect can be monitored using this trap are:
- Indian Meal Moth, Raisin Moth, Tobacco Moth, Almond Moth, Cigarette Beetle, Khapra Beetle, Warehouse Beetle, Mediterranean Flour Moth
- Packing :** #041-XLF-400-01: 5 units in re-sealable laminated foil pack
- Shelf life / Storage :** When stored correctly at room temperature, the product should remain active for a period of 2 years from the date of production.
- Handling & Disposal:** Avoid heat and direct sunshine. Dispose according to local regulation and away from monitored areas.
- Contact with Lures :**
- XLure RTU Wall Trap is safe to handle.
  - Avoid unnecessary and extensive contact with skin since some contaminants such as nicotine & pest control chemicals will have a repellent effect.
