

J.F. Oakes' New X-LURE™ Beetle Floor Trap

This new insect trap has been designed specifically for the effective monitoring and trapping of a wide range of **STORED PRODUCT BEETLES**. The design ensures that the **X-LURE™ Beetle Floor Trap** can be used in the dustiest of conditions, with no reduction in efficiency and will not spill any liquid if accidentally kicked over.

ATTRACTIVE BY DESIGN...

The X-LURE™ Beetle Floor Trap makes the best use of the powerful, combined attractiveness to stored product beetles of **HARBOURAGE, FOOD and PHEROMONES**.

The all-round entry slit offers insects an attractive dark harbourage in which to seek shelter and is angled to encourage upward movement of the beetles.

Trap body, lid & cartridge - Sugg. \$ 8.22

Trap body & lid only - Sugg \$ 4.50

Cartridge only - Sugg \$ 3.95
(pheromone & food lure)

Left photo: cross section through the Xlure™ Beetle Floor Trap showing the narrow entry, the entry ramp, the deep trapping pit lined with oil-impregnated filter paper, the CSL food extract lure plus the yellow 'Pherogel' lure capped with black rubber disk.

Trapping pit / Lure cartridge... can be purchased separately.

A special mix of food attractants, developed by the UK Government's Central Science Laboratory is highly attractive to a wide range of stored product beetles & their larvae and is the key attractant. Tests have shown that these include: Grain Weevils, Rice Weevils, Maize Weevils, Lesser Grain Borers, Foreign Grain Beetles, Saw Toothed Grain Beetles, Drug Store Beetles, Merchant Grain Beetles & Flour Beetles.

Also present in this trap is the long-established 'Pherogel' pheromone lure for: Red & Confused Flour Beetles, Cigarette Beetles and Warehouse & Khapra Beetles.

This is capped with a rubber disk to control the release of the pheromones.

In the bottom of the trapping pit lays a filter paper soaked in wheat germ oil, which is another powerful attractant for a wide range of these beetles.

Once the beetles fall on this surface, however, they get coated in the oil, which stops their escape. The oil also coats the insect's spiracles that induces death...no messy glue used!

EASE OF USE

The X-LURE™ Beetle Floor Trap is supplied in two parts:

1. The permanent trap, made from tough, injection-moulded polypropylene in 'Food Industry' blue.
2. Disposable 'lure cartridges' which are designed for up to 6 - 8 weeks use.

Trapping pit/lure cartridge

Each lure cartridge is sealed to ensure it reaches you at peak attractiveness. The foil seal is simply pulled off and the cartridge is pushed into position on the underside of the trap. The trap is then placed in position, close to machinery or other potential harbourages where beetles may be present.

The enclosed design of the trap means that it will remain effective in even the dustiest of conditions, such as in the flour-covered room to the left.

Product #	Description	Trap Size	Package Size
041-XLG-200	Xlure R.T.U. Multispecies Floor Trap with multiple pheromones to attract Cigarette, Red & Confused Flour, Khapra, Warehouse Beetles and food lure to attract all other stored product beetles	5" diameter 1.25" height	10pcs/box
041-XLG-100	Multispecies insert cartridge for Xlure R.T.U. Floor Trap		10pcs/box
041-XLG	Xlure replacement Floor Trap only. No pheromone/food cartridge		1-pcs/box

INSPECTION is easy too!

Simply pull the cartridge off the bottom of the trap.

Trapped beetles are immediately visible and can be easily removed (remember that no glue is used) for closer inspection.

The insects to the right are Confused Flour Beetles in a heavily infested factory!

After 6 - 8 weeks, the lure cartridges should be replaced with new ones.

In conclusion, the new X-LURE™ Multi Species Insect Trap offers PMPs:

- ❖ Highly effective monitoring of a wide range of stored product beetles and their larvae
- ❖ Effective in even the dustiest of conditions
- ❖ No potential for spillage of oil
- ❖ Easy use for the technicians
