

XLure-RTU

STORED PRODUCT INSECT MONITORING

Everything You Need for reliable insect monitoring

XLure R.T.U. is Ready To Use & Pre-baited with stored product & fabric insect pheromone combinations. Precision dosing and machine application of pheromone combinations in the glue delivers cost effective & efficient multi-insect monitoring per trap. Select from several multi-insect XLure R.T.U. products.

With XLure R.T.U. There is Nothing to forget. Absolutely no chance of installing traps with no pheromones because the pheromones are loaded in the glue.

XLure R.T.U. provides Accurate, Dependable Monitoring Pherogel, XLure's patented pheromone delivery system controls the release of pheromones. Pheromones are evenly and consistently released regardless of spikes in temperature. This steady supply of pheromones renders accurate monitoring data to reflect insect activity in an account.

XLure R.T.U. Reduces Installation Time & Labor. substantially over traditional installation of separate, individual pheromone dispensers.

COMBO 4

Fabric Insects Trap

Diamond Traps

Xlure's patented pheromone delivery system, Pherogel protects and controls the release of pheromones. Pheromones are evenly and consistently released over a 10 - 12 week period, regardless of temperature spikes. This steady supply of pheromones renders accurate monitoring data to reflect insect activity.

No refrigeration or cooler is required to store Xlure RTU Diamond Traps. Even in the hot summer months, have peace of mind when working your routes that the powerful pheromones in Xlure RTU Diamond traps are protected inside the special re-sealable foil bags.

Install & Replacement Date Area
Table to record weekly insect counts
Listing of targeted insects attracted

Multiple pheromones are loaded directly in the glue. Simply remove the traps you need from the reseal-able foil pouch, open the trap, insert hanger & install. Pre-baited traps alleviate the problem of arriving to an account with glue traps, but no pheromones. Another benefit with Xlure R.T.U. is there is less handling of pheromones, therefore there is less opportunity for accidental contamination. Insects can be repelled by pesticides, nicotine, scented lotions, & sanitizer residues easily transferred from hand to trap.

WEIGHT: 1.4 LB/BOX

Each trap has a metal strip to prevent undetected entry into food production lines that utilize metal detection equipment.

REDUCES LIABILITY.

Xlure-RTU The Inspector

A small trap for your big SPI jobs

Due to it's small size and low cost, Inspectors can be placed throughout large plants/warehouses to quickly zone in on insect hot spots, infestations & problem areas.

Trap Size {2 1/2" x 2 1/2" x 3/4"}

READY TO USE...

Pheromones {Plodia/Ephestia/Lasioderma serricornes} are loaded directly in the glue. Simply remove release paper, fold into box shape. It's ready to attract & capture:

Cigarette Beetles	Raisin Moths
Indian Meal Moths	Tobacco Moths
Almond Moths	Mediterranean Flour Moths

WHEN 'INCONSPICUOUS' IS IMPORTANT

The small, compact trap size allows for use in tight spaces or areas where monitoring should be inconspicuous; homes, grocery stores, pet shops, electrical panels. For both commercial & residential use.

- * PANTRIES * CABINETS * FOOD STORAGE AREAS * PET FOOD AREAS *
- * GROCERY STORES * SUPERMARKETS * PET STORES * FOOD PROCESSING PLANTS *
- * FOOD STORAGE WAREHOUSES * FREIGHT TRAILERS * FREIGHT CONTAINERS *

EASY TO INSTALL

Inspectors can be hung using the tab located at the top of the trap or secured to surfaces with the double stick tape located on the back of the trap.

Xlure-RTU

16 Week Lures

Xlure is the first system to use color coding to tell at a glance whether the pheromone lures have been replaced on schedule.

Designed to coordinate with the 4 quarters of the year, Xlure 16 Week Lures are available in blue, green, red & yellow. They can be replaced every 12 weeks to use & stay in sync with the 4 seasons color coding system. Use blue for winter, green for spring, red for summer and yellow for fall. Even under the 12 week schedule, these lures still last longer than conventional lures.

Dispensers contain pheromones for Plodia/Ephestia/Lasioderma serricorne (Indian Meal Moth, Almond, Raisin, Tobacco, Mediterranean Flour Moth, and Cigarette Beetles).

Xlure 16 week lures can be used with our Pro-Pest Diamond Traps, Delta Traps or any glue trap designed for indoor insect monitoring & trapping.

Xlure-RTU Mini Combo 4

Flexible, Versatile, Adaptable...

READY TO USE...

Small size, pre-baited multi-pheromone trap (4" x 6-1/2")
Attracts and captures:

Indian Meal Moth

Almond Moth

Raisin Moth

Tobacco Moth

Mediterranean Flour Moth

Cigarette Beetle

Khapra Beetle

Warehouse Beetle

Active life: 30 - 45 days

DESIGNED TO FIT IN BAIT STATIONS OR USE ALONE....

Mini Combo-4's can be used in Bell's Protecta Pest Monitor for extremely dusty environments. They can also be used in plastic pipes for special applications and situations. They can be used inside *The Advantage* Flying Insect Trap. Simply remove release paper from trap and form in a cylindrical shape to place inside Advantage trap or a pipe (do not crease trap when bending).

Mini Combo-4's can also be used alone. Hole punch and hang in pantries, storage rooms, warehouses, rail cars, trucks, grain elevators... places with insect activity.

GRID FOR EASY RECORDING OF INSECT COUNTS

Each trap has a convenient 3/4" grid printed under the glue area so counting insects is quick & easy.

Xlure-RTU

Multi-Species Beetle Floor Traps

**Xlure MST Beetle Traps
provide a perfectly enticing
environment for Stored Product Beetles....**

The top of the trap body completely covers a slotted base, keeping dust & debris out.

Angled body encourages upward movement of beetles.

A tab at the top of trap can be used with our tethering system (pg 19) to secure the trap in place, preventing unwanted removal/displacement.

An all-around crevice created between the top of the trap and base of the trap is enticing to stored product beetles which are seeking sex and shelter.

No messy liquids to accidentally spill out of trap

A rough textured crawl crevice all around the trap base makes climbing up and into trap easy.

Slick, straight up & down interior walls make escape impossible.

... accurate monitoring is critical
to successful stored product insect control

INSECTS ATTRACTED:

Cigarette Beetle
Sawtoothed Grain Beetle
Drug Store Beetle
Merchant Grain Beetle
Red Flour Beetle
Confused Flour Beetle
Khapra Beetle
Warehouse Beetle
Grain / Granary Weevil
Rice Weevil

How MST BEETLE TRAPS WORK

A combination of multiple beetle pheromones are loaded in a replace-able cartridge that easily attaches to the base of the trap body.

This powerful combination of pheromones attract most stored product beetles, as well as a wide range of borers and weevils.

Captured insects are captured and cannot climb the slick interior trap walls.

Confused flour beetles
in a heavily infested factory

Xlure-RTU

Multi-Species Beetle Floor Traps

EASY AS 1, 2, 3 TO INSTALL, MONITOR, & REPLACE.....

Trap Placement & Replacement:

Set traps 15' - 25' apart initially. Increase or decrease spacing as indicated by regular trap inspections for pinpointing infestations.

Replace cartridges every 6 - 8 weeks or earlier if full.

ACTIVE LIFE: 6 - 8 weeks

Key Trap Features with Efficiency and Safety in mind:

No messy liquid content to spill.

Captured beetles can be easily extracted from cartridge for identification.

Trap design keeps dust and debris out.

Trap body is durable, re-usable and food industry "blue".

Cartridges are easy to install, inspect & replace in seconds.

Each cartridge is sealed to ensure it reaches you at peak attractiveness.

For use in:

Any premises prone to stored product beetle infestations.

Food Processing Plants

Manufacturing Plants

Food Storage Facilities

Retail Pet Stores

Homes

Schools

Hospitals

Nursing Homes

Xlure-RTU

Fabric Insect Traps (F.I.T.)

Fabric pest populations are increasing in both residential and commercial accounts. Your customers depend on you to keep their valuable assets safe from insects. Early detection is critical to prevent these insects from causing serious damages. Until now, it has been notoriously difficult to monitor for fabric destroying insects... **until Xlure F.I.T.**

Xlure FABRIC INSECT TRAPS RELEASE MULTIPLE PHEROMONES TO ATTRACT:

Exploded view

Moths enter through 3 keyholes on the upper trap surface.

Beetle species & larvae enter through the all-around crevice created between the top & base of the trap. Base is angled and has a rough texture for ease of beetle climbing.

**QUICK & EASY
TO INSTALL,
MONITOR,
& REPLACE**

Xlure-RTU

RICE, MAIZE & GRANARY WEEVIL TRAP

Monitoring System for *Sitophilus oryzae* containing pheromone to attract the Rice, Maize and Granary Weevils. Place trap on the floor in suspected areas of infestation. In large areas space 8 - 10 meters (25 - 30 feet) apart.

Replace the cartridge every 6 - 8 weeks. Dispose of used cartridges away from monitoring area.

Storage: Store un-used cartridges in a chilled environment.

For use in Food Processing, Storage and Distribution facilities.

ITEM #	DESCRIPTION & PACKAGE SIZES	Wt (lb)	TRAP SIZE
#041-XL-6000	Kit for Rice Weevil Monitoring 5 traps & 5 cartridges/kit	1.0	5" Dia. x 1.25" H

**** Ask about the Xlure Tethering System to secure Xlure floor traps in place ****

PRO-PEST SAFESTORE RED-LEGGED HAM BEETLE TRAP

Monitoring System for Red-legged Ham Beetles, *Necrobia rufipes* containing a powerful attractant. Special glue area is designed to trap Red-legged Ham Beetles in all glue areas, not just outer edges of the glue area.

These insects are a major pest in pet retail facilities and areas where various meat related products have been dried through evaporation or long term storage. They also infest shipments of bone meal, fish meal, cheese, garlic & coconuts. The larvae often infest bone and dog biscuits in factories and various retail outlets.

Remove release paper from glue area, place 1 ml of attractant in middle of trap and place trap in suspected areas of infestation.

Active Life: Re-apply attractant every 4-6 weeks. Replace trap as needed.

Storage: Refrigerate attractant for long term storage.

ITEM #	DESCRIPTION & PACKAGE SIZES	TRAP SIZE
#041-RLHBT-K10	10 traps & 1 -10ml attractant tube.	8" x 3.75" x 0.75"
#041-RLHBA-50	50 -10ml attractant tubes	

Special glue pattern to increase catch throughout total glue area versus perimeter catches only.

Xlure®RTU

Simplify with Trap Accessories

PHEROMONE TRAP WALL HANGERS

QUICK AND EASY

Set your wall hangers in place to make replacements quick and easy. Reduces time & labor when replacing traps.

BETTER AIR FLOW THROUGH TRAP

Because traps are away from the wall, air flow can move through trap giving better pheromone flow throughout your accounts.

ITEM #	DESCRIPTION & PACKAGE SIZES
#041A-HGR-24	4 x 6pk (24 hangers/box)

Xlure®RTU TETHER SYSTEM

SECURES FLOOR TRAPS IN PLACE

Xlure's Tether System allows you to securely attach traps in your accounts. The plastic wall mount has double stick tape on the back and securely attaches to wall surfaces. The included wire simply slips through the tab at the top of any Xlure Floor Trap. This is particularly beneficial in those accounts where traps are always missing or moved. Never look for missing floor traps again.

ITEM #	DESCRIPTION & PACKAGE SIZES
#041A-TET-10	10 Tethers/bag
